

## **Motor Vehicle Record Agreement**

On September 13, 1997, the Federal Driver's Privacy Protection Act of 1994 (DPPA) was enacted. This law requires that not only American DataSearch, but also our clients, must strictly adhere to its guidelines. It is your responsibility to educate your employees as to the rules and regulations pertaining to this law. This law affects all records maintained by any DMV.

All motor vehicle record requests must be for a permissible purpose and with proper authorization, as required by the Fair Credit Act.

American DataSearch is required to maintain a service agreement with all customers stating that each will abide by these rules and regulations. Federal and State audits may be performed on a random basis to ensure that all vendors and their customers are in compliance.

American DataSearch ***will*** conduct random audits to ensure compliance. Any client/customer not able or willing to produce the requested information will immediately lose their access to motor vehicle reports through American DataSearch.

I have read the foregoing agreement and fully understand that we may be subject to future audits and that we agree to same.
